Subash Paul

+91 97740 49795 | subashpaul559@gmail.com | github.com/subashpaul | linkedin.com/in/subash-paul

Technical Skills

Languages: C/C++, JavaScript, TypeScript, SQL

Technologies & Tools: Next.js, ReactJS, NodeJS, ExpressJS, Tailwind CSS, Shadcn, MUI, Bootstrap, MongoDB, PostgreSQL, Azure DevOps

Areas of Interest: DevOps, Web Development, GenAI, Deep Learning, DBMS, Network Security

Experience

System Engineer, Tata Consultancy Services – Hyderabad, India — May 2026 – Present

- Contributing to enterprise software delivery and engineering best practices as part of the systems team

SDE, TigmaMinds Pvt. Ltd. – Guwahati, India | [Certificate] — Jul 2024 – Apr 2026

- Built a low-code/no-code workflow web application to automate API development for organizations, using ReactJS, NodeJS, Next.js, and TypeScript
- Managed deployments and pipelines through the Azure DevOps portal

SDE Intern, Digital Junction Business & Solutions LLP – Chennai, India | [Certificate] — Feb 2024 – Jun 2024

- Developed a full-stack MERN application for online interview assessments and deployed it, along with a FastAPI (Python) service, on Azure App Services
- Set up and maintained CI/CD pipelines on the Azure DevOps portal for automated hosting and deployment

Research Intern, Space Applications Centre, ISRO – Ahmedabad, India | [Certificate] — Jun 2023 – Jul 2023

- Worked on object detection and tracking algorithms in computer vision and image processing using MATLAB and Python
- Detected moving objects in video and predicted trajectories using algorithms such as the Kalman Filter

Open-Source Contributor, Hacktoberfest 2022 & 2023 | [Badge] — Sep 2022 – Nov 2022

- Built an event management web application for IIT Guwahati using Git, GitHub, HTML, CSS, and JavaScript
- Contributed to several open-source projects, including codebase deep-dives and bug fixes

Projects

Anomaly Detection in Cognitive Radio Networks using Autoencoders – Trained an autoencoder-based ML model in Python (NumPy, scikit-learn) to detect primary user emulation attacks, achieving strong results on abnormal-data testing

Multi-Step Form – Developed a fully functional multi-step form with HTML, CSS and JavaScript

BankUI – Implemented a Banking UI app using HTML, CSS and Vanilla JS. Various functions in JS and CSS styles for web design

Geo-Location App – Built with HTML, CSS, and vanilla JavaScript; covered third-party API integration, form UX, and the Geo-location API

Education

NERIST, B.Tech. in Computer Science and Engineering – Arunachal Pradesh, India — Aug 2020 – Jun 2024

CGPA: 9.70/10 (Gold Medalist) | Coursework: OOP, Databases, Data Structures & Algorithms, Operating Systems, Computer Networks, Compiler Design, Distributed Algorithms, Information Security

NERIST, 10+2 Equivalent, Electronics and Communication (Maintenance Engineering) – Arunachal Pradesh, India — Aug 2018 – Jun 2020

CGPA: 9.69/10 (Gold Medalist)

P.L.M. School, Matriculation / 10th – CBSE Board, Arunachal Pradesh, India — Mar 2004 – Feb 2016

CGPA: 10/10

Certifications

- **Front-End Web Development with ReactJS** – Coursera, The Hong Kong University of Science and Technology
- **JavaScript** – Udemy, Jonas Schmedtmann
- **Ethical Hacking** – NPTEL, IIT Kharagpur
- **Social Networks** – NPTEL, IIT Madras
